LeetCode

Education

Jaypee Institute of Information Technology, NOIDA

B.Tech in Computer Science Engineering (CGPA: 8.2 / 10)

Expected May 2027

NOIDA, India

Apeejay School, NOIDA

Senior Secondary (Class XII): PCMB – 92.2% , High School (Class X): 96.6%

NOIDA, India

Experience

Birlasoft Ltd

AI/ML Intern

Jun 2026 – Present

Noida, India

- Revamped an AI-powered **Proposal Assistant** by integrating an **enterprise LLM** with a **Node.js** backend via the **AG-UI** protocol, enabling real-time streaming, artifact generation, and human-in-the-loop interactions.
- Designed **5+ backend APIs** powering a **4-stage** proposal workflow with agent communication, streaming responses, and workflow state synchronization.
- Worked with the **CTO's team** to prototype enterprise AI solutions, evaluating **AG-UI**, **MCP**, **A2A**, and **LangGraph** for scalable agentic AI architecture.

DotBotics Pvt Ltd

SDE Intern

Apr 2025 – Jun 2025

Hyderabad, India

- Developed **Nest**, a production-grade cross-platform eCommerce app using **Flutter**, **Dart**, and **REST APIs** in a **4-member team** following **Clean Architecture**.
- Integrated **5+ payment gateways**, **JWT authentication**, and real-time cart synchronization for secure end-to-end transactions.
- Improved application performance by **~25%** through API optimization, caching, and efficient state management, reducing redundant API calls by **~35%**.

Projects

Vaaya – Admin-Driven Ecommerce Platform | Next.js, Node.js, Express, PostgreSQL, Prisma

Live Demo

- Architected a production-ready **E-commerce** platform with separate frontend, backend, and database services supporting end-to-end commerce workflows.
- Implemented **RBAC** using stateless **REST APIs** for secure management of products, inventory, users, and orders.
- Designed a normalized **PostgreSQL** schema with **Prisma ORM**, reducing data redundancy by **~30%** while supporting multi-vendor scalability.

PageX – Personal Cloud Storage with AI Optimization | Next.js, Node.js, PostgreSQL, AI Embeddings

Source Code

- Built a **file management system** with hierarchical folders, drag-and-drop support, and trash-based soft deletion.
- Created secure **REST APIs** with JWT authentication and optimized relational schemas in PostgreSQL.
- Integrated **vector embeddings** for semantic search, document summarization, and storage analytics.

Aegis – Predictive Crime Safety Platform | Flutter, FastAPI, PostgreSQL, ML

Source Code

- Developed a Flutter application visualizing **XGBoost-based crime predictions** across **77 Chicago communities**.
- Integrated **REST APIs** for time-based risk queries, improving response latency by **12%**.
- Engineered an interactive SVG map with optimized state management and API caching.

Achievements

- Solved **400+** Data Structures & Algorithms problems across LeetCode and other coding platforms.
- Achieved a **LeetCode Contest Rating of 1445**.
- Qualified for the **pre-final round of Smart India Hackathon 2025**, selected among **50+** institute-level teams.

Technical Skills

Languages: C/C++, Python, JavaScript, Dart

Frameworks & Tech: React.js, Next.js, Node.js, Express.js, PostgreSQL, Prisma, Firebase, Firestore, REST APIs, JWT, AG-UI

Core Concepts: DSA, OOP, OS, DBMS, Computer Networks, System Design, Clean Architecture, SDLC

Tools: Git, GitHub, Postman, Prisma Studio, Figma

Environment: Linux (Ubuntu), Windows
